

R→Imp Live in Care

Live In Care is 24/7 care that is provided to you in your own home. Live in carers settle into your routine seamlessly and are happy to help you in any manner that you need. There are many advantages of Live In Care but the biggest would be the fact that you can stay in the comfort and familiarity of your own home while still getting the care and support you need.

What do live in carers do?

Live in carers' responsibilities can range from companionship to active 24-hour care, it depends on your needs. They can help you around the house with domestic responsibilities such as housekeeping and cooking or provide personal care, post-discharge care and disabilities care.

Before you begin live in care, Rapid Care Managers will meet with you for a care assessment. This assessment will allow us to understand your needs and the type of carer that will be most suitable to you.

How do I find the best carer?

Live in carers are assigned to you according to your needs, medical history, required skills, language and location. You will be assigned 2-3 live in carers after your Care Assessment. Your live in carers will rotate shifts every 2 weeks.

Before you begin your care you will be able to meet with your carers and decide if you would like to work with them or not. Deciding if a carer is the right fit for you can be difficult, you can refer to our '[What Makes a Good Carer](#)' page for some tips and traits to look for in your prospective carer!
